2/5/77

Dear David Marvin,

I do not know what your resources are.

And I do think that before you start shooting you should have at least a tentative script.

In any event, as you read these books bear in mind that each represents the state of kx my knowledge as of the time of writing.

Try also to keep in my mind that some of the content is to address the lack of investigation not to declare proof. An example is the Milteer tape in Frame-Up, recentl and continuously misused by the House committee.

I presume that as you read and learn more will take shape.

When you do go to Dallas to shoot there are some pictures I would like you to take for me.

They relate to the sewer inlets on the north knoll and the fencing in that general area.

Also some pictures from one of those points, panning the area and focusing along Elm, along the path of the limousine.

Hastily,
